

Portable Devices for Logistics

All from a single source

Mobile Handheld Computer

Vehicle Mount Terminals

MAX Mobile Workstation

Wearables

Optimized processes in the following application areas:
Storage - industry - incoming/outgoing goods - inventory - management

Mobile Handheld Computer for scan intensive operations

MAX Mobile Workstation reduce work pathway

Optimized small parts order picking with the backhand scanner

Wearables Handsfree for optimized processes

- Powerful, robust & lightweight
- Fast training times and low error rates
- Easy and safe to use
- Secure and stable operating system (Android™ Industrial+ / Windows®)
- Robust and suitable for freezer use
- Voice order picking with the Vortex Elite+ with sturdy headset connector
- HasciSE backhand scanner with different carrying options

Vehicle Mount Terminals Robust and lightweight

- Ruggedised (IP65 Rated), suitable for ambient & freezer areas
- Secure and stable operating system (Android™ Industrial+ / Windows®)
- Memory backup via internal battery
- Resistive/capacitive touch
- High visibility display in all light conditions
- Easy installation and configuration
- High usability thanks to freely configurable function keys and external keyboard variants

Mobile Handheld Computer For fast and efficient work

- High usability through quick-entry keyboard
- Secure and stable operating system (Android™ Industrial+ / Windows®)
- Easy installation and configuration
- Function/navigation keys with double assignment (freely configurable)
- Large touchscreen
- Can be customised to requirement
- Application software available

MAX Mobile Workstation Saves travel time and makes IT equipment mobile

- Modern battery technology
- Easy battery exchange
- Multiple shift operation possible
- FI circuit breaker
- Countless options
- Laserdruckerfähig
- Laser printer-capable
- Approvals for Europe and USA
- Fast amortization (ROI calculator)
- Different financing models
